

Washington County: One Community 2007 Quality of Life Survey
Written Comments

General at end of survey: COMMENTS

Many people can't afford/don't have time for 2 years college to learn new job skills: small businesses, hospital, artists, craftsmen with state/federal monies can provide short term qualified training use by high school, grade school, post office, UMM for local job fulfillment.

I'm worried about here and now, we are dependent on oil, until we find an alternative. We have to keep using it and looking for it. I could care less if a moose in Alaska has to walk an extra mile to walk around an oil well! Vote out those tree hugging off the wall Liberals the next election!

Stop sub-divisions! Eat local and help farmers. Shop small local shops and "stop bigbox"! Keep local people in control, not people from away!

All business goes to Topsfield, except for driving license we go to Calais.

More people, more costs Less people, less costs

Progress is great, but not at the price of extreme loss of safety, security, and freedom.

You have left the most important item out of this survey, Volunteerism! I volunteer full time 5 days a week.

-No LNG -Leave small schools alone -Encourage trades education -Welcome Wagon type of greeting new people - Communicate social events between communities.

Poor pay more. Poor are patronized and ignored.

Is the new tower going up going to increase cell phone service?

Since this survey was about me specifically many things did not apply. If I had responded about the needs of the families I work with, many more circles would have been selected.
